

IMPROVE ERGONOMICS WITH

Treston Lifting Platform

Treston's Lifting Platform offers ergonomic adjustability even in environments where altering the height of workbenches is not feasible.

Such settings encompass logistics centers, where individuals operate alongside rigid infrastructure, conveyor belts, heavy machinery, and tools. In these circumstances, a lifting platform facilitates adaptable working heights, promoting ergonomic postures for employees.

The Treston Lifting Platform can be customized to suit specific customer requirements and seamlessly integrated into a wide array of intralogistics and other environments.

- ✓ **Improves ergonomics** - Makes possible to adjust the working height for employees working next to rigid infrastructures such as conveyor lines and big machinery.
- ✓ **Easy and safe to take into use** - Platforms performing with height <500mm include CE-certification.
- ✓ **Adaptable.** Platform can be accessorized with LCD holders and other useful accessories.
- ✓ **Complete workstation solution from one vendor.** Solution complements Treston's wide range of hyper-adaptable ergonomic furniture for logistics segment – workbenches, chairs, trolleys, lighting, storage systems

Width	Platform measurements can vary. Typical width 1-5 m
Depth	Platform measurements can vary. Typical depth 0,5-2,5 m
Height adjustment area	Platform measurements can vary. Typical height adjustment between 15-45 cm.
Maximum load	On typical kind of platform 400 kg. 300 kg dynamic mode / 600 kg static mode.
Certifications	CE certification for platforms which are of <500 mm height.
Height adjustment method	Available with foot and hand panel to adjust height. Adjusts to different customers needs and country legislations.
Accessories	Accessorizable. Platform can be accessorized with LCD holders and other useful accessories. Easy to modify and adjust to different needs and processes

Are you interested in efficient and safe in-house logistics process?

“Efficient logistics play a paramount role in a company’s success.

While many focus on optimizing supply chains and automating warehouses, it’s equally crucial to direct attention towards workstations. These workstations should not only be ergonomic but also seamlessly integrated into conveyor lines, facilitating a smooth and efficient workflow for the seamless movement of goods.”

The importance of ergonomics in the industrial workplaces is becoming more important day by day. The workforce is ageing and on the other hand the younger talent values workplaces which invest in workplace health and safety.

Treston is your one-stop-provider for all workstation needs

- ✓ Well-designed ergonomic, modular and height-adjustable workbenches along with needed accessories, lighting, sit-stand chairs, trolleys and storage solutions give you highly flexible solution
- ✓ Custom-made solutions made to customers specifications:
 - Solutions for integrating workstations to conveyor platforms, rigid infrastructures or collaborative robots
 - Lifting platforms

Examples of custom-made solutions for in-house logistics
